## Warframe mastery rank 1 weapons map location guide

```
Welcome to Warframe Today, Tomorrow and Forever! Warframe Today is your all in one spot for finding information about different frames, mods, where to farm them and how to make the most out of your time in the game. Mods Mods are used to enhance the abilities of a frame or weapon in-game. There are four types of mods, common, uncommon
rare and legendary. Every mod has a different drop chance. For example, Vengeful Revenant is one of the rarest mods in-game and is sold for around 120 platinum (Avg taken from waframe. There are different types of frames suitable for
various factions. Every frame has a different skillset. Farming Guides & Resources To build anything in WF, you need resources. Every planet can provide you with limited resources. Every planet you with limited resources.

new Livik 2.0 map which will be officially released soon in the game as well. After nearly 22 months of testing, tweaking, and full of action due to its very small size compared to other maps, which are 2×2 in size in PUBG Mobile. That's the factor that
makes this map will be chosen by players compared to other maps. On this occasion, Here's all you need to know about the new Livik 2.0 map. Download PUBG Mobile 1. New Themed areas There will be several areas in the Livik 2.0 map in PUBG Mobile, for players to enjoy and explore the map
With new themed areas, such as different architectures and layouts, players will change their tactics or strategies from before and take advantage of the available terrain to win. Midstein Image via Krafton First, we will drop on the Midstein area. Here there are many renovations around such as buildings with different roads and alleys that make this
area a complex urban area. In this map, close combat may often occur due to the many available alleys, besides buildings with higher floors will have more advantages, because of the wide road, therefore if you
can get a broad vision it will be a good thing during the battle. Besides that, there are interesting things in this area, namely a soccer field where players can play, because the developer also provides the ball and the goal, but be careful because if you are too busy playing soccer, the enemy will easily eliminate you. Logistic Center Image via Krafton
As the name implies, this area contains a warehouse and also a container, so this area has lots of covers that can be players who are skilled in movement, as well as good at close combat, will definitely dominate this area can be used as
a place to play hide and seek, because of the many houses and partitions available. 2. New Vehicle Image via Krafton In this latest update, there is a new vehicle can traverse all terrains such as mountains, hills, roads, and urban alleys present in Livik 2.0. Also, this vehicle can accommodate
as many as 4 people. 3. Weapon purchasing feature In the new version of the Livik map, there will be a Supply Shop where you can buy something in there, especially in upgrading weapons to their XT variant, different from the previous beta version. To get this XT variant firearm you could get it through crates, and airdrops, but this way is not always
guaranteed, therefore this change was made. Image via Krafton With this XT variant firearm, there will be a lot of diversity in the player's playing style, because the XT variant firearm is more balanced and easy to control. Moreover, this XT AKM firearm can shoot as many bullets as
you have in the bag without needing to reload, therefore it will make the weapon very overpowered. 4. New Map features Advanced Supply Zone. This
zone contains a lot of supplies such as items, weapons, or attachments. Advanced Supply Zone feature in Livik 2.0 map (Image via Krafton) However, because they also need supplies to continue until the end of the game. If you are a player with a playing style that dares
to fight risk and likes to fight many players at once, then this zone is perfect for you. Treasure Hunt Treasure Hunt in PUBG Mobile 2.0 (Image via Krafton) Apart from the advanced zone supply, you can also get weapons and other supplies from the plethora of crates, you can find them through the mini map that has been provided, making it easier for
players to get them. Soccer Challenge You can play football on this map by going to the blomster area because there is a soccer field that can be played together. If you score against the goal, then you will get some rewards. High Flying Vehicles in PUBG Mobile 2.0 (Image via Krafton) If you want to have fun using the vehicle,
you can slide through the available incline to reach places you can't reach on foot, and you will get rewards for that too. Zipline in PUBG Mobile 2.0 (Image via Krafton) By using a zipline, you can traverse from one place to another by hanging on the zipline. Berry Hunt If your health points decrease, you can restore them by eating the
available berries, so you don't need to use bandages or other boosts. Final Thoughts After a long wait for the Livik 2.0 map to be released, finally, in early May, players can officially play the map in the global version. Many features provided by the developer were not available in the beta version, which makes this Livik 2.0 map like a new map coming

There are many countries where people live
in environments where information is controlled by the government authorities or filtered through state-run media outlets. The facts and the news of the world are heavily distorted to shape the opinions of the common people. However, this creation has the purpose to throw light on the untold trove of published articles that can be accessed by
anybody capable of running the game, free of the influence of media censorship. 2. H.R. Giger Tribute Created by: Everbloom Games Everbloom Games Everbloom Games is an established team of Minecraft builders and creators whose build includes the reconstruction of the works of Swedish surrealist H.R. Giger, this world is a biochemical world of both surrealism
and beauty. Giger's art often intermingled the biological and the artificial, creating strange and breath-taking depictions of man and machine. His work is recognized most likely for being the basis on which the Alien film franchise is based, with the film's titular alien being based on Giger's painting Necronom IV. The details provided by the Everbloom
Games are amazing in this build. 3. Adamantis Created by: Jamdelaney1 The creation of the city of Adamantis has been done by the lone player, Jamdelaney1 which comprises over 60 million blocks. Constructed in the traditional Greco-Roman style with plenty of marble-like blocks, arches, and domes, Adamantis is a sprawling beauty to view from

Breath of the Wild Created by: Dinaeh The Legend of Zelda: Breath of the Wild has been one of the greatest RPG games in the past recent years. The dedication of Minecraft Redditor Dinaeh has made it possible for the players to experience the full scope of the world of Breath of Wild. The
inclusion of custom NPCs and the world's iconic temples has also been set forth by the creator. If some shaders are added into the mix the map might truly pop, emulating the beautiful lighting and bloom effects of the Nintendo title itself. 9. Mages College of Merdia Created by: Block_Fortress This build is inspired by The Elder Scrolls V: Skyrim's
College of Meridia which pays outstanding homage to one of The Elder Scrolls series' revered Daedric realm which makes the college fully functional inside and out. It does require some downloads which include a texture pack and recommended shaders, but to experience such a remarkable build
is a small price to pay. This build is worth downloading via Planet Minecraft for the fans of High Fantasy or The Elder Scrolls. 10. Herobrine's Mansion Created by: Hypixel Herobrine's Mansion and its secret rooms and depths.

Azumarill is a great choice for solo play because Azumarill excels in one-on-one duels with other Pokémon, which means teammates are not needed in fights. Azumarill has a relatively low base health amount for an all-rounder. Because of this,
players must wary of surprise attacks from enemies and practice using their high mobility to make lots of early game plays around the map. Map awareness is crucial when playing Azumarill. Save the Unite Move
for Zapdos. This is an easily overlooked aspect of the game that can change the entire outcome of the game. Saving the Unite move for Zapdos, ensures that they can secure the objective and win the game. Players must try to move around the opposing team during the Zapdos fight and use the combo of their abilities and the Unite move to wipe out
the enemy team. One must make sure to check the map before Zapdos spawns. They must look around in the bushes surrounding Zapdos to ensure there are no sneaky enemies waiting to steal it. different champions. Some are tanks, assassins, marksmen, poke champions, etc. One of these archetypes is control mages have three special characteristics such as having AoE spells and great wave-clearing capabilities. They have a very long-range, to safely poke the enemy
laner. Orianna is the literal embodiment of these characteristics in Wild Rift. In this Wild Rift guide, we will take a look at the best emblem, spell, and builds, including tips and tricks to dominate every game with Orianna. Download League of Legends: Wild Rift on PC Skill Analysis Orianna, as stated before, is a control mage. She can poke very well
and keep herself safe from a distance. Being a long-ranged character, she is great to play against melee mid laners like Yasuo and Fizz. She has got quite a few utility spells that help both her and her team throughout the game. In this Orianna guide, we are going to see how her abilities in LoL Wild Rift work and when you should use which skill to be
in the best shape in the current ranked season. Passive - Clockwork Windup Orianna's Attacks deal additional magic damage increases the more Orianna Attacks the same target. Orianna's ball acts as a focal point for her abilities. It automatically returns to her if she is too far away from it. For her passive, her attacks deal 13 magic
damage (13+15% scaling with Ability Power). Subsequent attacks on the same target within 4 seconds deal an additional 3 magic damage (3+3% scaling with Ability Power). Stacks up to 2 times. This is a useful passive in the mid-lane. When Orianna keeps attacking the same target. she does more and more damage to them. This helps her and gives
her an incentive to stick to one target and keep hitting them for more damage. Ability 1 - Command: Attack Orianna commands her Ball to fire toward a target location, dealing magic damage to targets along the way (deals less damage to subsequent targets). Her Ball remains at the target location after. This ability deals 50 magic damage (50+40%)
scaling with Ability Power) to targets along the way of the Ball. The damage decreases by 10% for each unit it hits (Minimum 50%). The Ball remains at the target location afterward. This is her main poking ability, constantly harassing the enemy and keeping them at bay. Ability 2 - Command: Dissonance Orianna commands her Ball to release a pulse
of energy, dealing magic damage around it. This leaves a field behind that speeds up allies and slows enemies by 20%; and speeds up allies by 20% for 2 seconds.
This effect diminishes over time. A great ability to use in teamfights in order to disrupt the enemy. Ability 3 - Commands her Ball to attach to an allied champion, Shielding them and dealing magic Resist to the
champion it is attached to. This ability has both an active and a passive. Passive - The Ball grants 10 Armor and Magic Resist to the champion that it is attached to. Active - When Orianna commands the Ball to attach to herself or an ally, it grants a shield that absorbs 60 damage (60+40% scaling with Ability Power) for 4 seconds. It also deals 50
magic damage (50+30% scaling with Ability Power) to enemies it passes through. This is the best ability to use on the team's carry-in teamfights. Ultimate - Command: Shockwave, dealing magic damage and launching nearby enemies towards the Ball after a short delay. This is Orianna's most
impactful ability. She can single-handedly change the tide of a teamfight by using this. Command: Shockwave deals 150 magic damage (150+70% scaling with Ability Power) to enemies after they have been launched towards the Ball. In the late game, this ability can chunk an enemy for a quarter of their health at once. It makes teamfighting easier,
and it also enables abilities like Yasuo's ultimate. Skill Up Methods for Orianna Orianna's skill level-up order is as follows: 1st Ability (Command: Protect): Level 1, 4, 6, 7. 2nd Ability (Command: Shockwave): Level 5, 9, 13. Best Rune Setups
and Spells for Orianna in Wild Rift Rune Setups Orianna has two rune setups Orianna has two rune setups depending on the mid-lane matchups) Electrocute (Against Ranged matchups) Electrocute activates when you damage an enemy with 3 different abilities or attacks in 3 seconds. Ranged matchups are difficult to use 3
back-to-back basic attacks on, so Electrocute helps to poke them and damage them with her basic attacks, making it easier to stack Conqueror on them. This, combined with her Passive, does a lot of damage to her melee
opponent over time. Image via Riot Games Brutal Brutal greatly helps Orianna in the early game, with her wave clear. Being a control mage, clearing the wave, and hence she can help her teammates more. Hunter - Titan
Hunter-Titan is best used on Orianna as she is not very mobile and hence vulnerable to Crowd Control (CC). When Orianna gets takedowns, her tenacity (tenacity helps to reduce the duration of stuns, slows, and other crowd control effects except for knock-ups) increases, and she can be a bit more aggressive against stronger enemies. Sweet Tooth
Great rune for Orianna. Helps her gain mana and gold when she is low. Summoner Spells Flash The best spell for Orianna is due to her low mobility. Combined with her third ability, Barrier can provide a really big shield to Orianna or her ally, whoever she uses the ball on. The best spell for her along with Flash. Best Builds for Orianna in League of Legends: Wild Rift. Luden's Echo: A great item for
Area of Effect damage. It builds up Discord stacks up to 100 when you move and cast abilities. At 100 stacks, it deals additional damage to your original target and up to three nearby enemies. One of the best items for poking. Stasis Enchant (Lucidity Boots): The ultimate defense against assassins. Completely negates dangerous abilities like Zed and
Fizz ultimates. Also prevents the enemy from targeting you, hence helping to get you out of a tricky situation, or stalling till your teammates arrive. The best enchants for immobile champions, and the Lucidity boots help with Cooldown Reduction for your abilities. Rabadon's Deathcap: The most powerful damage item for mages and other Ability
Power champions. It is filled with raw power, and gives the user +40% magic penetration, thus helping to get through any tanks who build Magic Resist items. Morellonomicon: The go-to anti-healing item for Ability Power by 40%. Void Staff: The best magic item against tanks. champions. Prevents the enemy from healing themselves by applying a Grievous Wounds effect to them for 3 seconds. This helps greatly during a teamfight, and against champions that can heal a large amount, like Soraka and Dr. Mundo. Overall a really great item to get against any lifesteal and healing champions. League of Legends: Wild Rift
Orianna Gameplay Tips As discussed before, Orianna is a control mage. She excels at controlling the pace at which mid-lane plays out in every match she is in. She can also control teamfights with her 2nd Ability and ultimate, as well as protect her teammates with her 3rd Ability. Thus, she can have a massive impact on the game if played properly
Keeping all this in mind, our Wild Rift Orianna Guide includes the perfect game plan for the early, mid and late game. Early Game During the early game, always punish the enemy when they try to go for last hitting minions. Keep your ball in the midst of the wave, and poke from as far as possible. Image via Riot Games You can bully the enemy
especially if they are a melee champion, and make their early game as difficult as possible. Coming out of the early game without deaths, and with more gold than the enemy, should be the main objective. Mid Game Mid-game with Orianna is about teamfights and preventing the enemy from taking down your towers. Always rotate to any fight you can
on the map to help your team, but also make sure to watch your towers. Orianna is great at defending them because her wave clear is remarkable, and she can quickly kill larger minions. Also, always watch your long-range and Area of Effect
abilities. Late Game In the late game, try to stay with your team, and use your abilities to their maximum. Always keep track of your Ball, and stay as far back as you can, just like the mid-game. Late game Orianna is very powerful in Wild Rift, due to the small map, as she can roam to side lanes, and also defend towers when needed. Image via Riot
Games Join as many team fights as you can, and fight for every objective. Being full build is a big power spike for her, and this spike should be utilized to the fullest to harass the enemy at every objective. League of Legends: Wild Rift Objectives Guide Final Thoughts Orianna is one of the safest mid-laners in Wild Rift. It is always safe to blind pick her when you are unsure of what else to pick. She is powerful at all stages of the game and is a good defender as well as teamfighter. Overall, she is a safe, stable, and dependable champion. If she goes ahead
or even in the above lane, then her team has a decent advantage, so try to pick her up for your team, and take advantage of all the tips provided above, to gain ELO and climb higher and higher!
